EDUCATION

UNIVERSITY OF MINDANAO

Davao City, Philippines

Bachelor of Science in Computer Science

2023 - Present

Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Web Development, Software Engineering, Database Management Systems, Computer Networks, Introduction to Cybersecurity, Artificial Intelligence, Machine Learning, Information Assurance and Security, Human-Computer Interaction, and Mobile Application Development.

SKILLS

Programming Languages

JavaScript (Proficient), Python (Proficient), PHP (Intermediate), SQL (Intermediate)

Frontend Development

React.js, HTML5, CSS3, Tailwind CSS, Responsive Web Design

Backend Development

Laravel (PHP), RESTful APIs

Databases & Tools

MySQL, Git, GitHub, Figma, Blender, Visual Studio Code (VS Code)

PROJECTS

[UMERCH \(University Of Mindanao Merchandise\)](#)

Laravel, React, Tailwind CSS, InertiaJs, MySQL, LaravelCloud Pages | 2025-2026

Developed a responsive creative portfolio featuring an interactive, cursor-responsive WebGL/Three.js particle field.

Implemented fluid, responsive scroll-jacking and custom page wipe transitions using GSAP.

Hosted and deployed the high-performance static site on Cloudflare Pages for seamless access.

[DonMachos Website Kiosk](#)

Laravel, Blade, Tailwind CSS, MySQL, Alpine.js | 2025

A full-featured coffee shop ordering system built with Laravel 12 and PHP 8.2, featuring a real-time menu browser, customizable product options (size, sugar level, mood), shopping cart management with inline editing, order tracking with unique order numbers, and a clean responsive UI using Tailwind CSS v4. Client-side interactivity is powered by Alpine.js, with HTMX enabling seamless AJAX page transitions and partial DOM updates for a smooth SPA-like experience. The system uses Eloquent ORM for database interactions, Blade components for reusable UI, and supports both dine-in and take-out ordering flows with multiple payment method options.

[Hybrid Enhance Nids\(Network Intrusion Detection System\)](#)

Python, scikit-learn, LightGBM and Bagging (DT) as base learners, Logistic Regression as meta-learner, | 2026

a multi-class NIDS that uses a stacked ensemble of LightGBM and Bagging Decision Trees with a Logistic Regression meta-learner, trained on CIC-IDS2017 and BoT-IoT datasets to classify 15 types of network attacks.

CERTIFICATIONS

IT Specialist – Databases - Issued by Certiport

Verified foundational knowledge in database design, query execution, and database administration.

IT Specialist – Cybersecurity - Issued by Certiport

Verified understanding of security principles, network protection, vulnerability defense, and secure operations.
